PROFESSIONAL SUMMARY

Analytical Information Technology student specializing in Applied Artificial Intelligence, with freelance experience in large language model (LLM) benchmarking, structured prompt engineering, and high-precision data annotation. An extensive career in healthcare operations, compliance, and data integrity provides added domain expertise. Proven record of maintaining quality standards, rigorously testing technical workflows, and bridging complex data requirements with clear, reliable execution.

SKILLS

Customer Service - Critical Thinking - Attention to Detail - Team Collaboration - Effective Communication - Prompt Engineering
AI Quality Assurance (QA) & Model Evaluation - Data Annotation & Labeling - AI agent workflows - Google Workspace
Microsoft Office 365 - Audio Transcription - Medical Devices - Medical Terminology

WORK EXPERIENCE

A.I. & Tech Freelancer

June 2026 - Present

- Evaluate and benchmark LLM outputs across complex multi-turn prompts, performing detailed data annotation and error categorization to maintain the highest labeling accuracy for training and fine-tuning pipelines.
- Engineer structured prompt frameworks during pre-release beta testing, systematically stress-testing models to identify hallucinations, safety vulnerabilities, and alignment gaps.
- Deliver high-precision transcription and audio verification for specialized technical and conversational recordings, applying rigorous quality assurance protocols to consistently achieve verbatim accuracy ahead of tight turnaround targets.

Independent Contractor

June 2024 – Present

- Processed 55-65 deliveries per week and utilized handheld devices to collect signatures, resulting in an 80% reduction in invoicing errors.
- Plan daily routes using GPS mapping applications and traffic data to reduce transit time, presenting ETA changes to dispatch and recipients to coordinate handoffs and improve delivery efficiency.
- Created a concise pre-trip checklist for navigators that shortened vehicle preparation time by 90% before shifts.

Evergreen Health Services

December 2016 - May 2024

Medical Assistant

- Managed patient check in through the Electronic Health Records (EHR), verified insurance information, and updated medical histories to support prompt provider review.
- Prepared exam rooms, sanitized instruments, and restocked supplies to support a daily patient volume of 15-20, keeping schedules for three providers running efficiently.
- Collected and labeled laboratory specimens, processed point-of-care tests, recorded vital signs, performed EKGs, and communicated any abnormal findings to the provider and clinical nursing team.

EDUCATION & CERTIFICATIONS

Campus- Sacramento (currently attending)
SUNY Niagara

*Associate of Science, Information Technology - Applied AI
Pre-Nursing Studies*

National Center for Competency Testing

Nationally Certified Medical Assistant (NCMA)
